

EDUCATION AND TRAINING

10/2024 – CURRENT
PHD IN COMPUTER SCIENCE University of Milano-Bicocca

The thesis focuses on developing safety mitigation strategies for large language models (LLMs) to ensure secure, helpful, and high-quality outputs, while also designing and implementing benchmarks to evaluate the safety of Italian LLMs.

09/2020 – 02/2024
MASTER'S DEGREE IN COMPUTER SCIENCE University of Milano-Bicocca

Designed and developed a dynamic graph embedding method based on deep learning for learning node embeddings in discrete-time dynamic graphs, integrating both structural relationships and node attributes.

Final grade Cum Laude | Thesis Dynamic Attributed Graph Embedding with Attribute-Structural Consistency and Complementarity

09/2017 – 07/2020
BACHELOR'S DEGREE IN COMPUTER SCIENCE University of Milano-Bicocca

Utilized signal processing and machine learning techniques to recognize the emotions experienced by human subjects through the analysis of electroencephalographic (EEG) data.

Final grade 106/110 | Thesis Emotion Recognition through EEG data
